PROJECTS

Travel-Log App

📅 February 2023

- Built a full-stack web app to allow users to post about their favorite places and locate where they are.
- Created a signup and login function where you enter your username and password before you enter the main page.

Social Media Platform

📅 January 2024

- Created a social media travel platform for users to engage with each other and share their travel blogs through tips, tricks, photos, and experiences.
- Created a website using Handlebars, MySQL, API usage, Express, and Sequelize. The project was built to create an application that allows users to create an account that is stored within a database for future login/logout functionality and be able to post content that other users may view.

Sports Odds App

📅 December 2023

- Created a website to display live odds from live/past NFL games using third party API's.
